

SPEED, CONVENIENCE, ACCURACY.

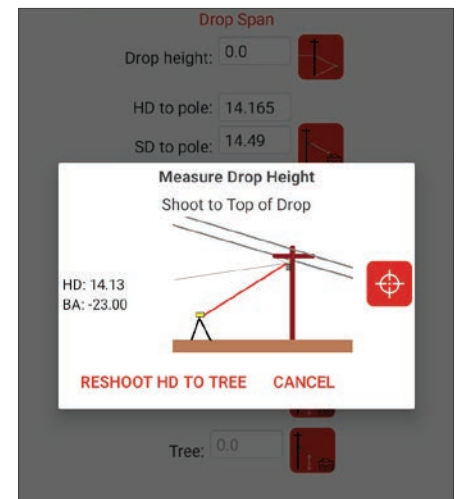

Quickly inspect or audit electric or telecom service drops to buildings with your TruPulse laser and LaserTech's Service Drop app. Collect information on the site and equipment type; and then make your drop, distance and clearance measurements with the laser – all from a safe location.

KEY FEATURES

- Easily gather multiple service drop measurements from one location
- Export reports in formats ready for submission to regulatory agencies and other customers
- Follow simplified graphic prompts to record the height of attachment on the pole and then the drop distance to the building
- Record clearance measurements to the drop wire over adjacent roadways, sidewalks and driveways
- Measure nearby trees to see if they are in danger of hitting the drop wire and store this data with the record
- Streamlined Laser and GPS connection screens

The LaserSoft Service Drop app is available for free with lifetime support included.

SAFETY GEAR, HEIGHT STICKS, AND MEASURING WHEELS ARE NO LONGER NEEDED!

[Download this free app for use with your Bluetooth enabled TruPulse laser](#)
