

CONNECT. MEASURE. RECORD

Laser Tech's Measure2 app offers the TruPulse® laser owner a quick, easy way to record measurements. All your critical distances, angles, heights and missing line values can be collected and stored with notes and photos. You'll never have to be without the ability to record your measurements again with the Measure2 app.

**KEY FEATURES**

- Compatible with Laser Tech's legacy TruPulse products and the new i-Series and TruAngle II
- Connect to GPS to record locations and laser offsets
- Switch between Distance, Height and Missing Line measurement modes
- Store notes and images for each data record
- Create text reports, a PDF with images or GPX & KML files with location data
- Update the firmware in your TruPulse 200i or 360i with our new OTA (over-the-air) update feature

Fill the gap in your data collection apps with Laser Tech's versatile Measure2
