▷ TRUSPEED® Sxb

Capture and Store Traffic Violations With Photos

SpeedCapture combines precision speed and range data from the TruSpeed® Sxb laser with an embedded image to create an enforcement record that can be saved and shared. Use the 7-power magnification and the zero speed feature to enforce parking and distracted driving violations with photos. This solution is currently being used by law enforcement agencies and private speed management companies around the world.

Enforce More Than Just Speed

- Distracted Driving
- Seat Belt Use
- HOV Lane
- Stop Sign/Light
- Parking

Save Time in the Field and Office

- Auto-accepts speed/range data and embeds it into an image in one shot
- Includes location information and laser serial numbers without the need for manual data entry
- Uses instant group-texting feature to share violation images with your traffic team
- Uploads enforcement records to department server location
- Files enforcement records that are easily retrievable for court purposes

Store Everything You Need

Automatic		Optional	
Speed	Time	Citation Number	Travel Direction
Range	Officer Name/Laser Serial Number	License Plate Number	Speed Limit
Date	GPS Data Number (if enabled)	Driver's License Number	Vehicle Details
		Offense Type	Additional Notes
